**Sugar Industry Analysis:**

The sugar production has improved to 26.50 million tonnes in the season 2011-12 (25.50 million tonnes during the 2010-11). This increase in production of sugar during the sugar season 2011-12 will result in improving the availability of sugar for export to other countries and lesser the import of sugar. The expected sugar consumption in India is around 25.00 million tonnes per annum. The expected sugar production in India for the next sugar season 2012-13 would be around 27.50 million tonnes on account of improvement in sugarcane due to remunerative sugar cane rates.

Indian Sugar Mills Association (ISMA) is pursuing with Government of India to decontrol the sugar industry, to get the long term export policy to get the higher realization, to assist the sugar exporting factories to mitigate the losses in export, to mandate the blending of ethanol at 10% with petrol and also aim at the final target at 25% as was done in Brazil. During the previous year, the sugar rates were stable on account of getting imported the required sugar from outside countries. The ISMA requested the Government of India to impose the custom duty on White Sugar, so that the sugar prices will improve in the domestic market.

The company has made a higher production of sugar of 60608 tonnes during the year as compared to the production of 57612 tonnes during the previous year.

**2. Use of Estimates**

The preparation of the financial statements in conformity with Indian GAAP requires management to make estimates and assumptions that affect the balances of assets and liabilities and disclosures relating to contingent liabilities as at the date of the financial statements and the reported amounts of revenue and expenses during the reported year. Actual results could differ from those estimates.

Fixed assets costing less than Rs.5,000 are fully depreciated in the year of purchase. Depreciation is provided on straight line method as per the rates and in the manner prescribed in Schedule XIV to the Companies Act, 1956.

Goodwill on Amalgamation is being amortised on Straight Line Basis over a period of ten years.

**4. Impairment of Assets :**

At each Balance Sheet date, the carrying values of the assets are reviewed to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. Where there is an indication that there is a likely impairment loss for a group of assets, the company estimates the recoverable amount of the group of assets as a whole, to determine the value of impairment.

**5. Inventories**
